## SUMMARY

Leveraging 2+ years of full stack expertise, I've driven innovation and delivered solutions for projects valued at over \$1 million. I excel in collaborative team settings, working effectively with 10+ members. As an aspiring Software Development Engineer, I'm committed to continuous learning and growth, having enhanced project efficiency by 30%. Dedicated to contributing to forward-thinking projects, I aim to create a meaningful impact in technology.

## EDUCATION

### B. Tech in Electrical Engineering

BTKIT Dwarahat, Uttarakhand Technical University

Aug 2018 - Aug 2022

75%

## SKILLS

**Technical Skills** Java, Microservices, Spring Boot, React.js, Angular.js, Node.js, Express.js, EJS, MySQL, MongoDB, PostgreSQL, HTML, CSS, Bootstrap, Javascript, Typescript, RESTful APIs, Git

**Tools Used** Github, JUnit, Jenkins, SonarQube, MongoDB Compass, pgAdmin, Generative AI tools

## EXPERIENCE

### Power Programmer

Infosys Limited

Nov 2022 - Present

Delhi, India

- Led software development using Spring Boot and Angular, crafting scalable microservices and interfaces.
- Integrated frontend with backend microservices, optimizing system performance and ensuring seamless operation.
- Implemented secure RESTful APIs, bolstering data exchange reliability, system security, and user trust.
- Collaborated in agile teams, fostering innovation, efficiency, and effective communication for top-notch solutions.

## PROJECTS

### Facebook Clone [Github](#)

- Developed Facebook clone with Spring Boot backend, MongoDB, and Angular frontend featuring 6 microservices.
- Achieved 40% performance boost with Gateway, Load Balancer, and Resilience for scalability and fault tolerance.
- Implemented authentication and authorization with Spring Security, reducing unauthorized access by 40%.
- Crafted over 15 responsive Angular UI components, enhancing user experience significantly.
- Integrated frontend components and backend services, enhancing communication efficiency by 40%.

### Ekart - Shopping Application [Github](#)

- Built e-commerce platform with React frontend, MongoDB, and Spring Boot backend, leveraging 5 microservices.
- Designed intuitive UI for browsing, selection, and checkout, boosting user engagement and experience by 25%.
- Integrated third-party payment APIs, reducing transaction time by 30% and improving payment security.
- Configured Consul cloud, reducing latency by 20% and increasing sales by 15% with load balancing and resilience.

## ACHIEVEMENTS

- Ranked in the top 1% on LeetCode with a contest rating 2200+ and a worldwide rank consistently below 3000.
- Achieved 34th All India rank in CodeKaze coding challenge, showcasing exceptional coding prowess.
- Participated in 200+ coding competitions and hackathons, emphasizing dedication to learning and development.
