WORK EXPERIENCE

ToXSL Technologies Pvt Ltd

Mohali, Punjab

Software Developer

March 2024 - Now

- Engineered and optimized Healthcare application, achieving 90% improvement in response time.
- Leveraged Java Framework and resources like Maven for efficient backend operation.
- Conducted API implementation, fetching, mapping and posting of data including to different APIs, endpoints for PUT, GET, POST and DELETE methods.

PROJECTS

TODO Application and Employee Management System

- Developed a TODO application with complete CRUD functionality using **Spring MVC** and **Spring Boot**.
- Implemented **Spring Security** for authentication and authorization. Utilized **Hibernate** and **Spring JPA** for database interactions, integrated with an **H2 console** for in-memory database management.
- Currently extending it into a **Employee Management Application** by incorporating a modern **ReactJS** frontend with a robust **Spring Boot** backend.

Drugs Reporting Application

- Led the development of a **role-based web application** focused on user-centric design and responsive layouts using **ReactJS** and **Spring Boot**.
- Delivered a seamless user experience by integrating a robust **ReactJS frontend** with a scalable **Spring Boot backend**.
